what happened
fixed during the experiment
future work
The 9B asked to leave the sandbox for a plain copy
explicit sandbox rules in the project's agent files
Leads re-ran finished teams after a summary
harness fix: the old request is framed as reference
Agents refused under full: one SLA class for all 9B subagents
SLA classes per agent kind
NIXL crash-looped on the hybrid model
VLLM_SSM_CONV_STATE_LAYOUT=DS on both replicas
Mooncake needed the caller to name each transfer
the client acts as Mooncake's proxy (transfer_id, bootstrap)
