
Locust: synthetic users, all measurements
Questions
49 NovaAI questions · 5 tenants
the same 2K-token context on every call
interactive (first token ≤ 2 s) or batch (≤ 30 s)
Documents
40 distinct ~10K-token documents
(copies of 4 real 10-K filings)
too many for one replica's cache, fit in two
each user: call, wait 0.5–2 s, repeat
tinyharness: 3 agent teams = 3 tenants
SQL · lead + 4 analysts
NovaAI's operations database (SQLite)
10-K · lead + 8 readers
4 annual reports, every claim cited
code · lead + 4 fixers
NovaAI's billing library, failing tests
lead: first token ≤ 4 s · subagent: ≤ 3 s
